

ARJUN CR

Lead UI/UX Designer · Product Design Leader · AI-Augmented Design

Bengaluru, India · arjunuix@gmail.com · +91 96119 87730 · arjuncr.design

SUMMARY

10+ years in product design. 4.5+ years leading a 10-person team across 12 shipped enterprise products in FinTech, Logistics, SaaS, and E-commerce. Known for taking ownership of hard design problems — legacy modernisation, compliance-heavy platforms, zero-to-one product builds — and getting them to production. Currently integrating AI tooling into design workflow to cut prototyping time and sharpen iteration speed.

EXPERTISE

Product & UX Strategy · Design Systems · FinTech & Enterprise Platforms

Team Leadership · 0 → 1 Product Design · Data-Heavy Interfaces

AI-Augmented Workflows · Compliance-Constrained Design · Stakeholder Management

EXPERIENCE

Lead UI/UX Designer · Saksoft, Bengaluru

Nov 2021 – Present

TransUnion CIBIL — National Credit Bureau Platform (Sole Design Lead, 3+ years)

- Sole designer on India's primary credit bureau platform — owned strategy, systems, and execution across 5+ product modules from day one.
- Rebuilt legacy credit reporting into structured dashboards; turned dense financial data into interfaces banking analysts could act on without training overhead.
- Converted 10+ multi-field financial forms into stepper flows — cut input errors and removed the need for back-and-forth with support teams.
- Built the component library and design standards that brought consistency across the platform and gave engineering a single source of truth for handoff.
- Worked directly with compliance and product leadership to translate regulatory constraints into design decisions — prevented two major rework cycles before launch.

RMT — Warehouse Management System

- Took the product from blank canvas to shipped — defined information architecture, interaction patterns, and visual system for a real-time multi-warehouse platform.
- Ran discovery workshops with ops and logistics stakeholders; surfaced 15+ critical edge cases that weren't in the brief, directly reshaping the backlog.

- Designed live operational dashboards that gave dispatchers real-time inventory status — replaced a manual check-in process that was causing daily delays.

Senior UI/UX Designer · Saksoft, Bengaluru

Mar 2021 – Nov 2021

- Set design standards across 3 SaaS platforms — created shared component guidelines that cut design-to-dev friction and reduced spec questions during sprints.
- Embedded in cross-functional squads as the design voice — drove alignment between product, engineering, and business on scope and interaction decisions.

Senior UI/UX Designer · Hash Connect, Bengaluru

Dec 2019 – Mar 2021

- Redesigned purchase and discovery flows for e-commerce clients — reduced funnel drop-off by tightening the path from browse to checkout.
- Built a visual system for a global CRM product used across multiple regional markets — one system, consistent output, no one-offs per market.

UI/UX Designer · DreamOrbit, Bengaluru

Nov 2016 – Nov 2019

- Shipped 8+ enterprise web and mobile products. Progressed from execution to full design ownership on multi-product client accounts within 18 months.

Earlier: UI Designer, Adisys Tech (2015–16) · 2D Animator, Mocept Tech (2013–15)

LEADERSHIP

- Managed a 10-person design team (3 seniors) for 4.5+ years — ran crits, set quality bar, handled hiring, and built the career framework designers were promoted against.
- Shipped 12 products across FinTech (2), Logistics (3), SaaS (4), E-commerce (2), and EdTech (1). Most as sole or lead designer.

TOOLS & METHODS

Figma · **Miro** · **Adobe XD** · **Photoshop** · **Illustrator**

Design Systems · **Wireframing & Prototyping** · **User Research & Testing**
